

Big Reactions

One moment. A few words. Enough for today.

START HERE

Choose one recent moment. Fill in any one box first. Skip anything you do not know.

If things are difficult right now, put this aside and focus on safety and support.

1 BEFORE | What was happening?

An activity, a change, waiting, or a request. What did you notice?

2 DURING | What did your child say or do?

Write what you saw or heard. You do not need to explain why.

3 AFTER | What happened next?

What did adults do? What support was offered? How did it end?

OPTIONAL | Anything else worth noting?

Circle only what you noticed. These are clues, not causes.

Noise / Pace / Tiredness / Discomfort / Not sure

You can stop here. Keep your notes private; no need to send them to APC.

Come back when you are ready

A second moment can give you something to compare.

NO NEED TO FINISH THIS TODAY

Choose a similar situation. It can be one that went more smoothly, or another difficult moment.

1 BEFORE | A second situation

What was happening? What else did you notice around your child?

2 DURING | What did your child say or do?

A few words about what you saw or heard are enough.

3 AFTER | Support and what happened next

What did adults do? How did the situation end?

ONE THING TO NOTICE AGAIN

What was similar? What was different?

Example: "Leaving was easier when we had more time."

Circle one observation in your notes. No clear pattern yet is okay.

Two moments cannot confirm why a reaction happened. You do not need to record every reaction or change several things at once.
